## ●Material:

Galvanized steel sheets are usually used, with anti-rust treatment on the surface. Some use color steel tiles, which have sun-protective and anti-corrosion coatings on the exterior, providing good rainproof and anti-corrosion performance.

## ●Structure:

The frame structure is sturdy. Some sheds adopt designs such as thickened beams and top corner protection to enhance stability, and some are also equipped with waterproof floors, making them suitable for various outdoor environments.

### ●Extra-Large Space:

The space is as spacious as a small house, capable of accommodating a large number of gardening tools, equipment, potted plants, and can even serve as a small workshop or leisure space, meeting diverse storage and usage needs.

### ●Easy Installation:

It usually comes with a detailed instruction manual with step-by-step diagrams. Parts are clearly labeled, and screw holes are precisely positioned. With 2 people working together and using tools like screwdrivers and wrenches, assembly can be completed in approximately 2 hours.

### ●High Durability:

It typically has a service life of 15 to 20 years. As long as regular inspections and maintenance are conducted to prevent rust and damage, it can maintain a good working condition.

Flexible door opening

## ●Integrated Functionality:

Integrates functions such as garbage storage and firewood storage into one unit, meeting multiple outdoor storage needs in one stop without the need to arrange multiple storage facilities separately.

## ●Lockable Design:

Equipped with locks, it can prevent garbage from being rummaged at will. At the same time, it can also prevent pets and others from contacting the garbage, ensuring the hygiene and safety of the environment.

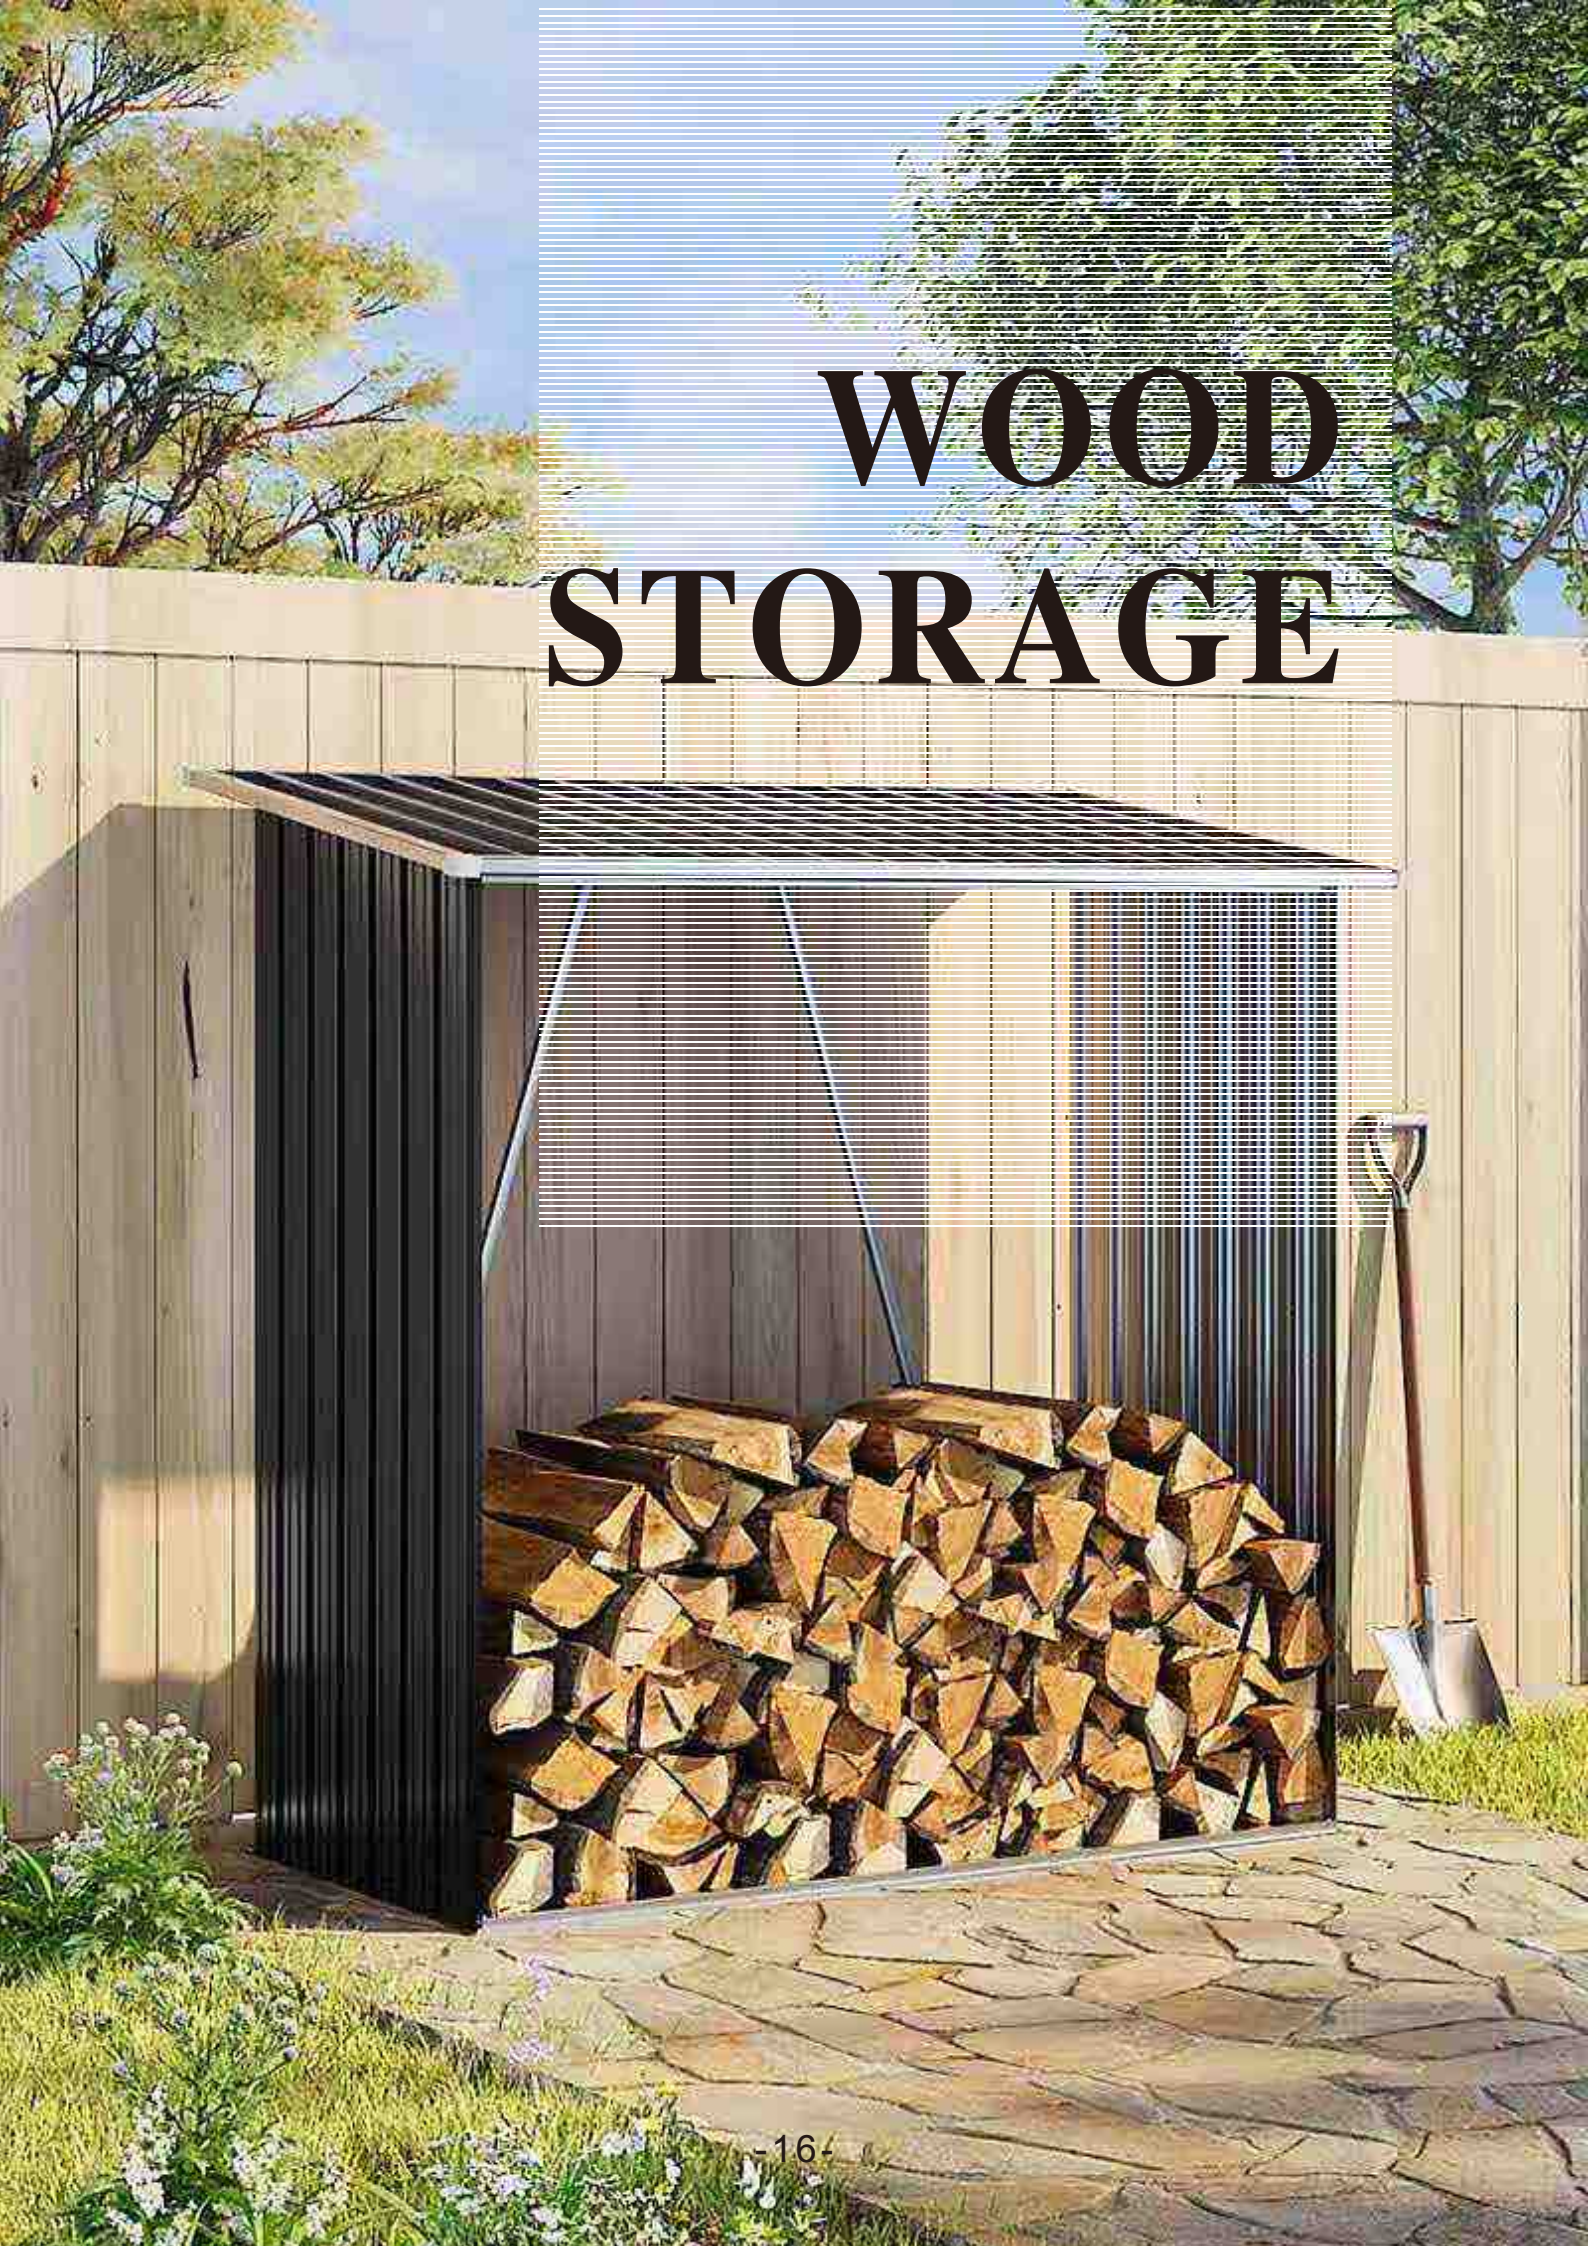

## ●Durability:

The metal material is strong and durable, corrosion-resistant and wear-resistant, and can adapt to various usage scenarios indoors or outdoors, with a long service life.

## ●Ventilation:

The louvered design of the cabinet doors ensures internal ventilation, which can effectively reduce the accumulation of garbage odors and keep the air fresh.

# WOOD STORAGE

| 83*163*154       | 170*50*7           | 14.5    | 15.65   |

### ●Storage Function:

Specifically designed for storing firewood, it reserves fuel for outdoor fireplaces, bonfires, etc., and meets the need for centralized storage of firewood.

### ●Practical Design:

It has a rain shelter on the top, which can effectively prevent firewood from getting wet by rain, helping to keep the firewood dry for subsequent use. The open storage structure is conducive to the ventilation of firewood, further ensuring the dryness of the firewood.

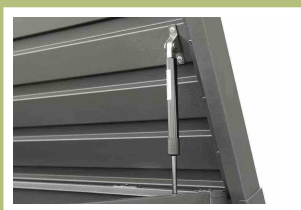

### ●Easy Installation:

With a simple overall structure and few assembly steps, users can easily complete the installation, saving time and effort. It can be put into use without the assistance of professionals.

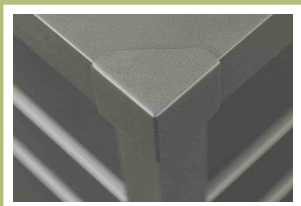

# TRUNK STORAGE BOX

### ●Ample Space:

The interior can hold a large number of outdoor items, such as pool toys, pillows, sports equipment, etc., meeting the storage needs of various outdoor supplies.

### ●Durable Material:

Made of galvanized steel sheet, it is sturdy and solid, able to withstand outdoor environmental factors like wind and sun, and has a long service life.

### ●Safe and Convenient:

Equipped with a lock design, it can ensure the safety of stored items; the flip-top opening makes it easy and quick to take and place items; the placement layout can be flexibly adjusted according to the usage scenario.

## ●Easy Operation:

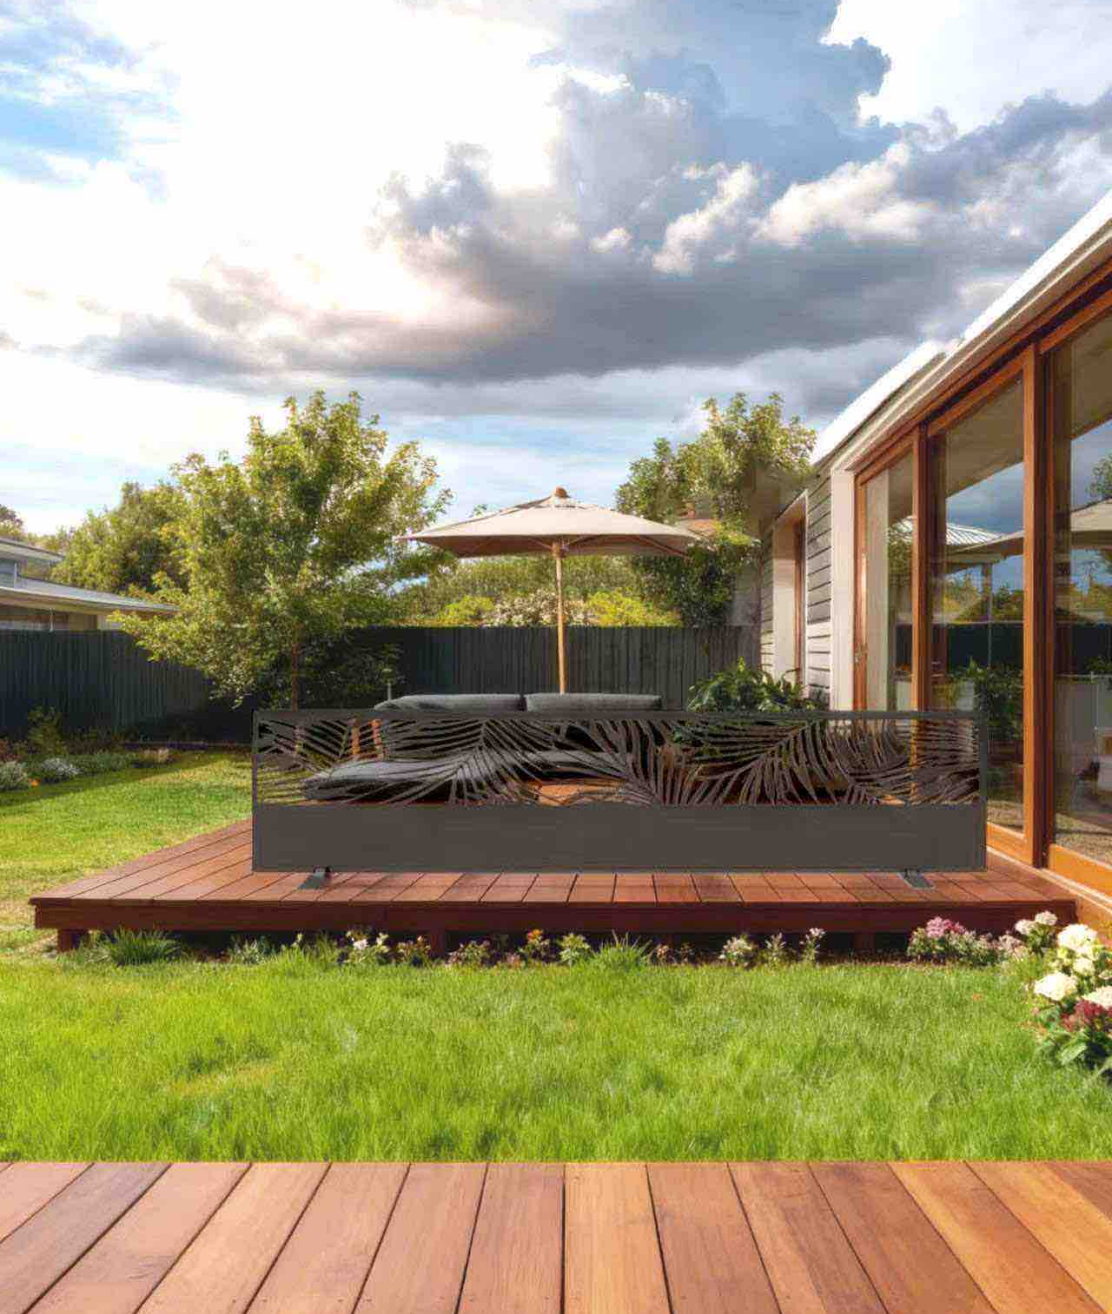

Equipped with a hydraulic strut structure to support the flip-top opening. When opened, it can easily hold the lid stably at a suitable angle, allowing users to take and place items calmly with both hands. At the same time, it can effectively prevent the lid from falling back unexpectedly and quickly during use, ensuring operational safety from the mechanical structure level.

## ●Multi-functional Box:

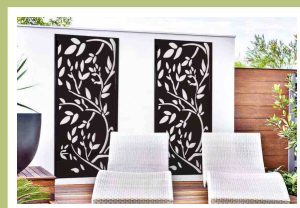

The lid has excellent load-bearing performance and can be directly used as a temporary outdoor stool when closed. Whether for a short rest during gardening work or as additional seating for gatherings with relatives and friends, it can be perfectly adapted.

### ●Ample Space:

Made of iron sheet, it has strong corrosion resistance and deformation resistance, allowing long-term use in outdoor environments with a long service life.

### ●Sufficient Planting Space:

The box has a large capacity, which can hold a variety of flowers, green plants or vegetables, meeting diverse planting needs.

### ●Easy and Flexible Installation:

With a simple structural design, it is easy to assemble. It can be flexibly placed according to preferences and spatial layout, and is suitable for various outdoor scenarios such as courtyards and gardens.

## ●Planting Convenience:

The planting space is regular and sufficient, suitable for planting various vegetables, herbs or flowers. The relatively high structure of the box can avoid bending over for labor, improving the comfort of planting operations. At the same time, it can also reduce the problems of weeds and pests caused by direct contact between the soil and the ground.

## ●Functionality:

It has good drainage, which can effectively avoid root rot of plants caused by water accumulation. It is highly mobile, convenient to adjust the position according to light, spatial layout, etc., and meet the growth needs of different plants.
